EDUCATION

New York University — B.A. in Computer Science (Incoming) - Fall 2026 · Expected May 2030
New York, NY

The Harker School — High School Diploma - Sep 2022 – Jun 2026
San Jose, CA

AP Examinations: Computer Science A (Data Structures), Calculus BC, Statistics, Macroeconomics, Microeconomics, Environmental Science, European History, U.S. Government & Politics, U.S. History, Biology

Advanced Coursework: Honors Differential Equations, Honors Discrete Mathematics

HONORS & AWARDS

USA Computing Olympiad (USACO) — Silver Division - 2023

- Advanced to the Silver division of the national competitive-programming olympiad by solving timed algorithmic and data-structure problems.

WORK EXPERIENCE

University of California, Los Angeles (UCLA) — Student Researcher - Jul 2025 – Jun 2026
Environmental Data Science · Remote

- Joined a UCLA Environmental Data Science research group through its pre-college program and continued the collaboration externally for several months afterward.
- Analyzed satellite remote-sensing data against ground-based field measurements to study water usage and plant water stress, working directly alongside UCLA professors and PhD students.
- Built interactive maps of environmental disasters from remote-sensing datasets and presented findings in a final research poster and presentation. **Python, QGIS, Excel.**

PROJECTS

Stock Backtesting Website — biswas.net/sid/stocktest - 2026 – Present

- Built a full-stack web application that lets a user define a stock-trading strategy and simulate its performance across historical market data, benchmarked against a buy-and-hold baseline.
- Modeled real-world frictions — capital-gains taxes, trading commissions, and transaction costs — to expose whether a strategy's apparent edge survives once those are deducted, since many strategies that beat the market on paper fail in practice.
- Engineered a Python simulation engine behind a React.js and TypeScript interface; developed with Claude Code. **Python, React.js, TypeScript, Claude Code.**

Dou Shou Qi — biswas.net/sid/doushouqi - 2021 – Present

- Digitized and built a playable web version of the classic Chinese strategy board game, including AI bot opponents to play against. **Python, HTML5, JavaScript.**

TECHNICAL SKILLS & LANGUAGES

Programming & Tools: Python, JavaScript, TypeScript, Java, React.js, HTML5, QGIS, JMP, Microsoft Excel, Adobe Illustrator, Claude Code

Spoken Languages: English (native/bilingual), Bengali (full professional), Chinese (elementary)

VOLUNTEERING

San Jose Public Library — Volunteer - Dec 2022 – Present

- Cataloged new book acquisitions, organized children's materials, and wrote book reviews for the library's website.

Second Harvest of Silicon Valley — Volunteer - Jan 2025

- Sorted and packaged produce, ran quality inspections, and upheld food-safety standards.

LEADERSHIP & ACTIVITIES

President, Harker Table Tennis Club - Sep 2022 – Jun 2026

Member: AI Club, Game Development Club, Badminton Club
